

## **Vacancy: Global Privacy and Data Flows Fellow**

**Allied for Startups is looking for a Global Privacy and Data Flows Fellow!** We're looking for a startupper: a self-starter, independent, motivated and tech-savvy individual. As our data flows fellow, your main tasks will be to build bridges between policy makers, startups, and industry, thereby setting the scene and building the backbone of impactful policy campaigns through research and writing, and building connections. Ideally, the candidate has first-hand experience in data and tech policy /or EU affairs, a curiosity for startups and innovation. We are looking for someone who is curious, has a positive and can-do attitude while demonstrating a sense of political acumen, humor, and team spirit!

**About us:** [Allied for Startups](#) is the voice of startups in politics and government. We represent over 46 European and global startup associations (BESCO, Startup Canada, Startup Malaysia), making their voice heard in international organisations and governments. Our fields of work include digital policies and startup-relevant topics such as platform governance, data, artificial intelligence, and digital health.

**About the position:** This is a new position and it consists of a 12-month Fellowship to research, publish and develop policy concepts around the increasing challenge for data-intensive startups to transfer and process data in a global and interconnected society. The role is designed to consider these issues from a startup perspective while establishing a broader dialogue with investors, academics, policymakers, and companies in various industries who have been dealing with the issue for longer and can lend their expertise to the startup ecosystem.

### **The ideal candidate should meet the following requirements:**

- Be a self-starting data & policy enthusiast; an independent & creative thinker;
- Excellent language skills in English;
- Emotional intelligence and strong interpersonal skills are a must;
- Knowledge and understanding of the global policy landscape
- Demonstrates skills to lead organisational and administrative tasks;
- Hold a bachelors' degree.
- Be eligible to work in the EU.

### **Main duties and responsibilities:**

- Shape and execute a workstream on data flows related policies;
- Encourage open dialogue with policy makers and other relevant stakeholders;
- Do research on policy issues and drive their uptake internally & externally;
- Contribute to further positioning and advocacy efforts;
- Build & maintain ties with stakeholders in the data policy space;

- Play a proactive role in everyday operations.

**We offer:**

- Be part of a unique, dynamic and flexible team organisation;
- The opportunity to build knowledge and a network in data startup and policy;
- Exposure to a vibrant startup and innovation scene and policy makers;
- Influencing and shaping the public debate around cutting edge technologies;
- Opportunity to put your creativity to the test implementing own ideas;
- A competitive remuneration package under a [Convention d'immersion professionnelle](#);

**To apply:** please send us a 1- page CV, (europass format will not be accepted) and a 1-page motivation letter that answers the following questions: Why is this position relevant in the current policy environment and how would you do in the role?

Please send your application to Ines Moreno [talent@alliedforstartups.org](mailto:talent@alliedforstartups.org). Applications will be reviewed on a rolling basis until the position is filled. As a small team we are unfortunately unable to answer all applications, if you haven't heard from us after 1 month of submitting your application you may assume that unfortunately your application was not selected.
